

Video Intercom System for Housing Estates and Residential apartments.

Features

Enhanced security and convenience - door stations with Keypad or RFID access control.

Supports snapshot recording of visitor images with option to forward them by email.

Range of Terminals – Integrates with iPhone, iPad, Android tablets, IP Video Phones, Cordless Phones, Wall mount Panels etc.

Multiple Gates – supports multiple entrance gates.

Lift Control – Can integrate with Elevator control systems for greater convenience and security.

Modular system - Can be expanded to support upto 3000 users.

SIP Surveillance – When integrated with SIP cameras the control room can receive video calls when alarm is triggered thereby enabling them to see what is happening in real time.

All devices work on network cable - saving cabling costs and makes installation quick and easy.

Future Proof – IP is the technology of the future.
