

## SIP Surveillance Solution for Homes and Offices.

### Features

**Enhanced security and convenience** – Unlike traditional network cameras SIP cameras can call video phones / tablets and stream video when triggered enabling users to see and hear what is happening in real time.

**Two way Audio** capability allows users to talk or make announcements via bidirectional speakerphones.

**Snapshot recording of images** on SD card with option to forward them by email.

**Remote View** - Access cameras through your mobile phone, tablet or PC and view video.

**Multiple Viewing Options** – View on your Mobile, iPad, Android tablet, PC, IP Video phone, Wall mount video panel etc.

**Motion detect recording** / Round the clock recording option with High definition Network video recorders.

**Advanced features** - WDR, Motorized Varifocal, EPTZ, 3D DNR and IR ensure optimum picture quality.

**All devices work on network cable** and are PoE enabled to save cabling costs and make installation quick and easy.

**Future Proof** – SIP is the technology of the future,
