

Customised Call Management Solutions.

An IP PBX offers many advantages, flexibility to customise applications for different industry segments is perhaps the greatest of them. A few applications are listed below

Hotels, Motels and Serviced Offices.

Professional Hospitality Solution ensures higher productivity and profitability.

Reception – Check-in / Check out, Booking, Room Groups, Display Room Status, Set Call rate for guest calls, Billing Report, Customer list etc.

Room Service – Calls between rooms, Set Do Not Disturb, Schedule wakeup calls, Set room status via phone, Room Service request, Locked after guest checkout.

Call Accounting

The Call accounting module offers Flexible rate settings and detailed records making it extremely easy for SMBs to monitor usage charges, track misuse and control communication costs.

The daily, weekly, monthly spend by each user can be tracked thereby allowing management to factor in the communication cost incurred by each employee.

Aged Care Homes

The Room monitor application combined with microphone speakers and SIP cameras allows carers to remotely monitor status of the occupants quickly and efficiently. Video streaming with two way audio can also be enabled for monitoring via IP Video Phone for better results.
